DAY TWO – Wednesday, 14 June 2023

Alvisse Parc Hotel, 120 route d'Echternach, L-1473 Luxembourg ([map](#))

Time CEST	Topic / session type
9:30 – 11:00	Session 3: Interactive workshop: Insurance for MSMEs The combined challenge of the MSME penetration gap and insurance's image problem must be recognised and addressed. This session will be all about exploring the importance of nuanced MSME segmentation approaches and synergies between emerging risk management solutions and insurance that can enable insurers to better tap into the MSME segment, and MSME businesses understanding the relevance and significance of the protection on offer.
11:00 – 11:30	Coffee break
11:30 – 13:00	Session 4: Interactive workshop: Building the resilience of smallholder farmers Increasing climate risks make and keep people poor, driving farmers into poverty and discouraging investments in opportunities for improved resilience and welfare. Integrating complementary innovations such as agricultural insurance together with other climate risk management programmes allows farmers to better cope with shocks far more successfully than when applying these interventions individually. This session will explore how integrating risk management solutions that are truly complementary, can be a real win-win for both clients and insurance companies and how broader-based risk management tools that are climate-responsive and cost-effective can be a resilience-bolstering game-changer.
13:00 – 14:00	Lunch
14:00 – 15:30	Session 5: Interactive workshop: Improving health outcomes Noncommunicable diseases (NCDs) have sometimes been thought of as “rich-country” diseases – but the opposite is, in fact, true. <u>According to the WHO</u> , of the 41 million deaths due to NCDs each year, 77% are in low- and middle-income countries. How is the inclusive insurance sector responding to this “silent epidemic” – and what more can be done to help prevent and manage NCDs? Come and explore solutions with us!
15:30 – 16:00	Coffee break
